

**Ordinance No. 262-15**

**ORDINANCE REPEALING AND RECREATING SECTION 262-15  
OF THE MUNICIPAL CODE RELATING TO BUILDING,  
SEWERS AND CONNECTIONS TO SEWERS.**

The Village Board of the Village of Hustisford, Dodge County, Wisconsin, do ordain as follows:

SECTION 1: Section 262-15 of the Hustisford Municipal Code shall be repealed and recreated to read as follows:

**Sewer Permits**

No unauthorized person(s) shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit.

There shall be two classes of building sewer permits:

- (1) Residential and commercial service; and
- (2) Service to establishments producing industrial wastes.

The owner(s) or his agent shall make application for a sewer permit on a form furnished by the Village. The permit application shall be supplemented by the plans, specifications, or other information considered pertinent by the Village. A permit and inspection fee for a residential, commercial or industrial building permit shall be paid to the Village at the time the application is filed.

**Sanitary Sewer Connection Charge (SSCC)**

**Payments of the Sanitary Sewer Connection Charge.**

In addition to the sewer permit, a SSCC for a single family residence shall be stated in the Fee Resolution for the Village. There shall be no SSCC for users whose building are connected to a lateral unless the building use increases\*. No credits will be issued for building use decreases. Connection charges for connections after May 22, 2006 shall be paid upon issuance of a building permit.

*\* Example of a building use increase would be a single family residence being converted to a duplex. An additional connection charge would be due upon the issuance of a building permit.*

**Calculation of Connection Charge.**

The basic connection charge shall be for a single family residence. The Utility Manager shall determine the residential equivalency units for multi-family dwellings, Commercial, Industrial and other units based on the following:

Single Family Residence	1.00
Duplex	2.00 per building
Multiple Family	1.00 per unit

**Commercial and Industrial Rates.**

The SSCC for commercial, industrial or any other unique user that does not readily fit into the residential category of users is based on the "Residential Equivalency Charge" or REC. The REC shall be determined by the projected water consumption obtained from the following table, divided by the consumption of the average residential user\*, multiplied by the current single family residence SSCC fee. The minimum REC equivalency shall not be less than 1.00.

*\* The average residential consumption shall be determined by taking the average monthly consumption of water used by all residential users and dividing by the average number of residential customers in the previous calendar year. (for the purpose of this calculation, water consumption and sewerage discharge are considered equal)*

***REC Calculation Example:*** SIC code 9224, has 2.3 gallons per employee hour, 15 employees at 173 hrs per month =  $2.3 \times 15 \times 173 = 5969$  Gallons. Assuming a average residential flow of 4000 gallons per month,  $5969 / 4000 = 1.49$  REC.

<u>CODE</u>	<u>DESCRIPTION</u>	<u>GALLONS PER EMPLOYEE HOUR</u>
0742	Veterinary Services for Animal Specialties	20.0
