Please have your electric and gas utility account number available prior to calling.

- ➔ ENERGY STAR® qualified Light Emitting Diode (LED) Light Bulbs – LEDs use at least 75% less energy than incandescent bulbs, producing less heat and more light per watt. Plus, they have an extremely long life span, about 25,000 hours.
- ➔ High-Efficiency Showerhead – Efficient showerheads lower the gallons of water used per minute, without compromising performance – allowing you to use less water, and potentially lowering water and heating bills.
